

## Artisan Studio 7.0 Due for Release in August 2008

**Artisan Studio® Version 7.0, its all-in-one standards-based development tool suite.**

### Interoperability - Cross functional and full lifecycle

**Simulink Integration** - synchronize parametric equations and requirements between the Artisan Studio model and Simulink and integrate Simulink code

**DOORS® Integration** - updated integration offers bi-directional syncing of requirements and links to items in SysML Model

**Merge Sandboxes** - 3-way merge capability allows cohabitation of model sandboxes

### Model Driven Development - Full Lifecycle

**State Diagram Simulations** - run state diagram animation while running on target

**Automatic Code Synchronizer and Template Development Kit** - Continuous code synchronization between the model and generated code, allowing use of your preferred coding environment

### Have it Your Way® - Flexible and Scalable to Your Process

**Domain Specific Modeling** - create custom ergonomic profiles for proprietary or industry-driven standards, or utilize those options available from us

**Automatic Code Synchronizer and Template Development Kit** - allow you to apply your own code standards to the code synchronizer or use available templates for C, C++, C#, Ada and Java

### Improved Usability - New Look and Feel

**UI Facelift** - Latest themes including new usability features

**Improved Usability** - Simplified and more flexible Component Sharing and User Admin

**Compatible** - continued backwards compatibility with 3rd party integrations and previous Artisan Studio versions

Artisan<sup>®</sup> Software Tools is the world's largest independent supplier of industrial-grade, collaborative modeling tools for complex, mission-critical systems and software.
